

Home Appliance Controller/PCBA

Since March 2000, we have developed and manufactured more than three thousand types of PCB controllers for a wide variety of applications, including home appliances, personal care devices, and other apparatuses. We are committed to understanding your needs and consistently strive to meet and exceed your expectations in terms of quality, value, cost and completion. Our dedicated teams work closely with you in a concerted effort to tackle issues such as safety and electromagnetic interference, and to help you secure your end products' certifications such as GS, TUV, CE, SAA, UL, FCC, EMC, etc.

Controllers for Home Appliances:
