Total Certified for SFM Standards (with double certifications)* **30,426,353 ha** **12,122,446 m³**

Total Area Certified to More Than One SFM Standard (subtract)** **0 ha** **0 m³**

Total Certified for SFM Standards(without double certifications)*** **30,426,353 ha** **12,122,446 m³**

* Data for Hectares and AAC is provided by the certification programs. AAC (annual allowable cut) is not reported for all areas and is influenced by many factors, including the age distribution of the forest and the salvage of wood damaged by insects and diseases, and can vary from year to year within a given time.

** Refer to the Footnotes Listings for more information on areas certified to more than one standard.

*** If a forest area has been certified to more than one of the three Sustainable Forest Management (CSA, FSC, SFI) standards, the area is only counted once, hence the total of certifications for SFM standards may be less than the sum of the individual totals for CSA, FSC and SFI. AAC total is not accurate as AAC is not reported for all areas.
