ANTIQUE AUTOMOBILE RADIO, INC.

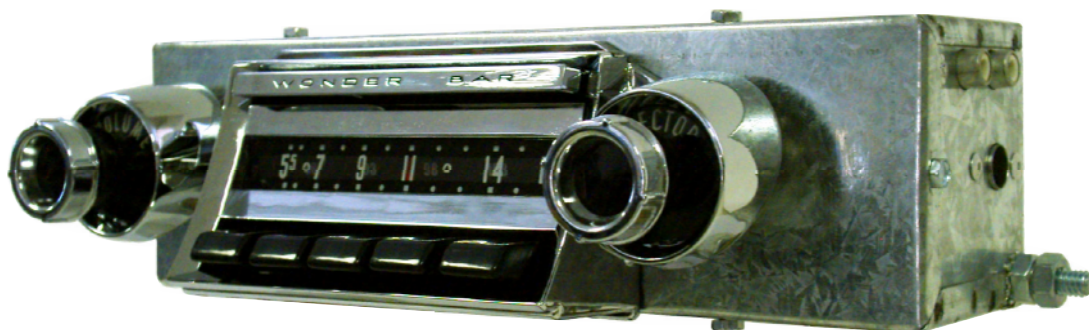

Better-than-NOS Radios!

1967-68

Camaro and Firebird

Why settle for a cheap modern radio that's sort-of-made to fit, or install a hidden audio system when you can have the real thing plus so much more? Our new radios have the look and feel of the original radio, but with the performance you expect from today's technology. Shown above is a 1967-68 Chevrolet Camaro or Pontiac Firebird radio. From the dash every piece you see has been designed to match the original. We paid meticulous attention to detail. For example, the thread and diameter of each shaft bushing is the same as was used originally. The dial fonts are exact duplicates. The dash bezels are die cast. Our Wonderbar radios seek up the dial until they reach the top, then return rapidly to the bottom and start over just like the originals did. The tuning knob and pushbuttons make the dial pointer move the way they're supposed to. No digital displays here! Behind the dash it's a different story. Powerful electronics are built into a chassis that is only 2-1/2 " deep, making some of these radios only 10% of their original size! ***Does size matter?*** There is room for electric wipers and/or air conditioning! All radios have RCA inputs for Ipod, MP3 or XM options. Radios with push-buttons have 10 presets (5 AM and 5 FM) When an OEM AM/FM radio wasn't offered, the dial background is subtly printed with the FM dial scale. Inside the case is our proven digital tuner system with a 180 watt RMS power amplifier! Two powerful microprocessors monitor the "human interface" (knobs & pushbuttons) and, through the magic of software, make the radio dial imitate the original while pumping out a sound that is cleaner and much more powerful than the best radio that was available when your car or truck was new! In stock now: All 1947-59 Chevrolet and GMC Truck radios, 1951-52 , 1955, 1956, 1961-62 Chevy Car, 1957, 1958 Chevy Wonderbar, all 1958-62 Corvette radios, 1966 GTO, 1967-68 Camaro and Firebird, 1969-70 Chevy 1969-72 Chevelle, 1969-76 Camaro and Nova. We are tooling many more hard-to-find radios. Watch our website or call for more information. Ask about applications for cars and trucks with 6 volt systems. European channel spacing optional on all models. Each radio comes with a detailed instruction booklet. **Designed and manufactured in the USA by American workers**—just like your car or truck was!

Automobile Radio VIBRATORS

Antique Automobile Radio, Inc. has been supplying the world-wide market for vibrators since 1982. We manufacture solid state vibrators in metal cans to exactly match the originals for most US and foreign car radios made between 1932 and 1960. We stock over 50 different types for immediate delivery. You can access our extensive database to learn more or look up the correct vibrator for your application on our website: www.antiqueautomobileradio.com or call us with your particular needs. Retail pricing starts at \$29.95 for standard types. Quantity discounts are available.

Full Range Speakers Sold in boxed sets with wiring & installation kit

6-1/2" Linear Series 3 way speaker. 100 watts peak, 50 watts RMS. 60 Hz—20 kHz, 4 ohm, 86 dB SPL. 2-1/8" mounting depth. Includes covers, 6-3/4" adapter plate for OEM replacement. Great for kickpanels! **\$79.95/pair**

4X6" Linear Series 2 way speaker. 60 watts peak, 30 watts RMS. 130 Hz—20 kHz, 4 ohm, 86 dB SPL. 2" mounting depth. Includes covers, OEM replacement or use 2 for a stereo 6x9 replacement **\$79.95/pair**

5X7" Linear Series 3 way speaker. 80 watts peak, 40 watts RMS. 75 Hz—20 kHz, 4 ohm, 86 dB SPL. 2-1/4" mounting depth. Does not include covers. Also fits 6x8" and 6" pincushion applications. **\$79.95/pair**

6X9" Linear Series 3 way speaker. 160 watts peak, 80 watts RMS. 47 Hz—20 kHz, 4 ohm, 90 dB SPL. 3-1/4" mounting depth. Includes covers. Our best-seller! **\$99.95/pair**

TERMS: Prices shown in this catalog are FOB Palm Harbor. Shipping is additional. **Minimum shipping charge is \$5.00 each order.** Florida residents must add 7% sales tax. Florida dealers please include your resale certificate. VISA, MASTERCARD and PayPal orders welcome. **We do not ship COD.** Store hours are Mon. - Fri. 8:00 - 4:30 Eastern time. You may place orders online any time. World-wide shipping via Postal or FED EX.

RETURN POLICY: Returns must be made within 30 days of date of invoice, and be accompanied by the original invoice number and a brief explanation of the reason for the return. Returned merchandise must be in the original packaging and in resalable condition. Parts returned due to customer error will be subject to a 20% restocking charge. Return freight charge must be prepaid. COD returns will not be accepted. Custom built or "not in catalog" items are not returnable.

RETURNED CHECK POLICY: A check dishonored for any reason by the bank on which it is drawn is subject to a \$25.00 service charge. In addition, you agree to pay any other reasonable charges imposed by any check verification company or collection agency that we may use for collection.

FREIGHT DAMAGE: If you receive merchandise that has been damaged in transit it is important to keep the shipping carton, packing and parts intact. Call us immediately to initiate a claim.

AVAILABILITY: Prices are subject to change without notice and quantities of some items may be limited. All of our radios are hand-made by craftsmen one at a time. It can take several weeks for us to build yours, so place your order early.

ONE YEAR LIMITED WARRANTY: All of our products are thoroughly tested and guaranteed to perform as specified for a period of one year from date of purchase. The seller cannot control the use of these parts, therefore the seller makes no warranty, express or implied, other than replacement of a component that fails to operate. Further, since defects in a customers radio (i.e. shorted buffer condensers or power transformer, etc.) or electrical system can destroy a vibrator, power supply, or other components, this warranty is limited to ONE replacement. In no event shall our liability exceed the buyer's purchase price nor shall we be liable for any indirect or consequential damages. This warranty does not apply to products that have been subject to misuse, neglect, accident, or modification. Return the defective item to us and include sufficient shipping and handling (minimum \$5.00) for a prompt replacement.

WE DO NOT DO FM CONVERSIONS ON ORIGINAL RADIOS! Please do not send your original radio to us - it will be returned. If you want to have your original radio converted to AM/FM/Stereo, please use our dealer look-up on our website or call us for the name of the nearest factory authorized dealer.

The original **Positive Ground POWER INVERTERS**

Operate modern 12 volt negative ground accessories from **positive ground** 6, 8, or 12 volt electrical systems! Our Power Inverters are very small (1-3/4" X 1-3/4" X 1-3/4"), lightweight (only about 9 oz), quiet, and extremely efficient. They use a common ground, so isolation is not necessary. Current draw is negligible when no load is applied (quiescent current is about 10 milliamps), so they are ideal for memory maintenance or alarm systems that must be left on for long periods of time without discharging the vehicle battery. Overload and Reverse Polarity protected for long reliable life. Possible uses include: **Radar Detectors, CB radios, Phones, Modern Stereo Radios, Alarm Systems (Control only), CD and MP3 Players, Satellite receivers.**

Input Voltage -4 to -16 volts Output Voltage +12.6 volts. Maximum Output Current - 6 volt systems:

- 6 Volt input (engine off) = 3 Amps continuous duty
- 7.2 Volt input (fast idle) = 3.5 Amps continuous duty
- 12 Volt system = 6.0 Amps (min), 7 Amps (max) cont. duty

Model # PGPI-HC with instructions _____ **\$99.95**

Designed and manufactured in USA

The original **Negative Ground VOLTAGE BOOSTERS**

For 6 or 8 Volt **negative ground** systems, provides 12.6 volt negative ground output from a 4 to 10 volt input. Small size (1-3/4" X 1-3/4" X 1-3/4"), lightweight (only about 9 oz), quiet, and extremely efficient. Maximum output current:

- + 6 Volt input (engine off) = 4.5 Amps continuous duty
- +7.2 Volt input (fast idle) = 5.0 Amps continuous duty

Model # NGVB-HC with instructions _____ **\$99.95**

Note: Our Power Inverters and Voltage Boosters are not intended to run motors, solenoids, ignition coils, door locks, lights, fans, trailer brakes, power antennas, power seats, wipers or other inductive loads.

Designed and manufactured in USA
